## IX. STATE SYSTEM LEVEL DATA

This section details the study findings for state system-level data by individual state. A brief discussion of the findings follows each table.

Figure 36: Public Library System Total Operating Budget Status by State.

| State | Increased since last fiscal year | Decreased since last fiscal year | Stayed the same as last fiscal year | Percentage increased | Percentage decreased |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Alabama $(\mathrm{n}=206)$ | $34.7 \% \pm 4.8 \%$ | $4.5 \% \pm 2.1 \%$ | 47.9\% $\pm 5.0 \%$ | 6.9\% | 6.1\% |
| Alaska $(\mathrm{n}=81)$ | $32.0 \% \pm 4.7 \%$ | $4.0 \% \pm 2.0 \%$ | 56.0\% $\pm 5.0 \%$ | 4.8\% | 15.0\% |
| Arizona $(\mathrm{n}=28)$ | 0\% $\pm 4.5 \%$ | 0\% $\pm 3.8 \%$ | $0 \% \pm 5.0 \%$ | 18.7\% | 1.1\% |
| Arkansas $(\mathrm{n}=43)$ | $54.5 \% \pm 5.0 \%$ | -- | 45.5\% $\pm 5.0 \%$ | 15.2\% | -- |
| California $(\mathrm{n}=166)$ | $50.0 \% \pm 5.0 \%$ | $9.5 \% \pm 2.9 \%$ | $34.2 \% \pm 4.8 \%$ | 5.8\% | 6.6\% |
| Colorado $(\mathrm{n}=104)$ | $45.3 \% \pm 5.0 \%$ | $22.7 \% \pm 4.2 \%$ | 29.4\% $\pm 4.6 \%$ | 15.8\% | 4.1\% |
| Connecticut $(\mathrm{n}=194)$ | 68.6\% $\pm 4.7 \%$ | $2.8 \% \pm 1.7 \%$ | 21.1\% $\pm 4.1 \%$ | 5.8\% | 2.0\% |
| Delaware $(\mathrm{n}=17)$ | 80.0\% $\pm 4.1 \%$ | -- | -- | 8.5\% | -- |
| Florida $(\mathrm{n}=56)$ | $57.0 \% \pm 5.0 \%$ | $6.8 \% \pm 2.6 \%$ | $26.7 \% \pm 4.5 \%$ | 7.2\% | 33.4\% |
| Georgia $(\mathrm{n}=58)$ | $12.9 \% \pm 3.4 \%$ | $9.3 \% \pm 2.9 \%$ | $64.5 \% \pm 4.8 \%$ | 8.2 | 3.6 |
| Idaho $(\mathrm{n}=104)$ | $74.5 \% \pm 4.4 \%$ | -- | $17.5 \% \pm 3.8 \%$ | 3.7\% | -- |
| Illinois $(\mathrm{n}=626)$ | $38.6 \% \pm 4.9 \%$ | $9.0 \% \pm 2.9 \%$ | $38.2 \% \pm 4.9 \%$ | 7.3\% | 8.2\% |
| Indiana $(\mathrm{n}=239)$ | $48.3 \% \pm 5.0 \%$ | $12.3 \% \pm 3.3 \%$ | $30.8 \% \pm 4.6 \%$ | 156.9\% | 9.4\% |
| Iowa $(\mathrm{n}=537)$ | $36.7 \% \pm 4.8 \%$ | $7.2 \% \pm 2.6 \%$ | $42.8 \% \pm 5.0 \%$ | 5.0\% | 14.5\% |
| Kentucky $(\mathrm{n}=116)$ | $73.6 \% \pm 4.4 \%$ | $4.6 \% \pm 2.1 \%$ | 19.5\% $\pm 4.0 \%$ | 9.5\% | * |
| Louisiana $(\mathrm{n}=65)$ | $23.1 \% \pm 4.3 \%$ | 10.8\% $\pm 3.1 \%$ | $53.3 \% \pm 5.0 \%$ | 36.9\% | 68.1\% |
| Maryland $(\mathrm{n}=21)$ | $85.7 \% \pm 3.6 \%$ | -- | $14.3 \% \pm 3.6 \%$ | 6.6\% | -- |
| Massachusetts $(\mathrm{n}=370)$ | 58.4\% $\pm 4.9 \%$ | $7.6 \% \pm 2.7 \%$ | 19.8\% $\pm 4.0 \%$ | 4.9\% | 5.7\% |
| Michigan $(\mathrm{n}=378)$ | $43.4 \% \pm 5.0 \%$ | $11.2 \% \pm 3.2 \%$ | $37.0 \% \pm 4.8 \%$ | 12.4\% | 11.2\% |
| Minnesota $(\mathrm{n}=132)$ | $54.5 \% \pm 5.0 \%$ | $6.3 \% \pm 2.4 \%$ | $24.1 \% \pm 4.3 \%$ | 5.2\% | 5.8\% |
| Mississippi $(\mathrm{n}=44)$ | $48.1 \% \pm 5.1 \%$ | $7.4 \% \pm 2.7 \%$ | $40.7 \% \pm 5.0 \%$ | 4.5\% | 26.0\% |
| Missouri $(\mathrm{n}=145)$ | $34.8 \% \pm 4.8 \%$ | $13.9 \% \pm 3.5 \%$ | $37.8 \% \pm 4.9 \%$ | 7.6\% | 12.4\% |
| Montana $(\mathrm{n}=79)$ | $24.3 \% \pm 4.3 \%$ | 9.9\% $\pm 3.0 \%$ | $46.1 \% \pm 5.0 \%$ | 4.7\% | 10.8\% |
| Nevada $(\mathrm{n}=20)$ | $33.9 \% \pm 4.9 \%$ | $10.7 \% \pm 3.2 \%$ | 42.8\% $\pm 5.1 \%$ | 6.9\% | 25.0\% |

Figure 36 (above) reveals that total operating budgets have increased since last year in the highest percentages of library systems in Delaware (80.0\%), Maryland (85.7\%), and Rhode Island ( $76.4 \%$ ). The total operating budgets have decreased since last year in the highest percentages of library systems in Colorado (22.7\%), Ohio (17.4\%), and South Carolina (15.5\%). The total operating budgets have stayed the same since last year in the highest percentages of library systems in Alaska (56.0\%), Georgia (64.5\%), and Ohio (53.5\%).

Figure 37 (above) that Internet information technology budgets have increased since last year in the highest percentages of library systems in Delaware ( $60.0 \%$ ), Kentucky ( $48.3 \%$ ), and Maryland (47.6\%). The total Internet information technology budgets have decreased since last year in the highest percentages of library systems in Missouri (64.1\%), Rhode Island (37.5\%), and South Carolina ( $27.6 \%$ ). The total Internet information technology budgets have stayed the same since last year in the highest percentages of library systems in Iowa (77.1\%), Oregon (79.3\%), and West Virginia (87.8\%).

Source: Bertot, J. C., McClure, C. R., Jaeger, P. T., \& Ryan, J. (2006). Public Libraries and the Internet 2006: Study Results and Findings.
Tallahassee, FL: Information Use Management and Policy Institute, Florida State University. Available: http://www.ii.fsu.edu/plinternet/
According to Figure 38 (above), the states with the highest percentages of library systems receiving E-rate discounts for Internet connectivity are Indiana (70.8\%), Louisiana (89.2\%), and Mississippi ( $63.0 \%$ ). The states with the highest percentages of library systems receiving E-rate discounts for telecommunications services are Louisiana (79.5\%), South Carolina (89.4\%), and West Virginia (79.1\%). The states with the highest percentages of library systems receiving Erate discounts for internal connections are Minnesota (22.6\%) and Mississippi (29.6\%).

Figure 39 (below) documents reasons that library systems did not apply for E-rate funding. Library systems in Washington (35.4\%) and Wyoming (60.9\%) were most likely to not apply due to the complexity of the application process. Library systems in Wyoming (30.4\%) were also most likely to feel that the library system would not qualify for E-rate funding. Library systems in South Dakota ( $45.5 \%$ ) and Wyoming ( $45.7 \%$ ) were most likely to believe that it was not worth applying because the funding level would be too low to justify the effort. Library systems in Massachusetts (47.0\%) and Rhode Island (47.2\%) were most likely to mot apply due to receiving E-rate as part of a consortium. Library systems in Delaware (20.0\%) were most likely not to apply due to being rejected in the past. Library systems in South Dakota ( $24.2 \%$ ), Washington ( $30.4 \%$ ), and Wyoming ( $60.9 \%$ ) were most likely to have not applied as a result of the filtering requirements of CIPA. Library systems in Colorado (11.2\%), South Dakota (15.2\%), and Wyoming ( $30.4 \%$ ) were most likely to have applied for E-rate funding in the past, but now no longer find it necessary.

Figure 39: Public Library System Reasons for Non-Receipt of E-rate Discounts by State.

| State | The E-rate application process is too complicated | The library staff did not feel the library would qualify | Our total E-rate discount is fairly low and not worth the time to participate | The library receives it as part of a consortium, so does not apply individually | The library was denied funding in the past | The library has applied for E-rate in the past, but because of the need to comply with CIPA, our library decided not to apply in 2006 | The library has applied for Erate in the past, but no longer finds it necessary |

Florida State University. Available: http://www.ii.fsu.edu/plinternet/

As can be seen in Figure 40 (below), the highest percentages of library systems do not offer information technology training for patrons in Arkansas (39.6\%), Louisiana (48.7\%), and Mississippi $(40.7 \%)$. The highest percentages of library systems offer training related to local economic development in Maryland (14.3\%) and North Carolina (14.5\%). The highest percentages of library systems offer training to those who otherwise have no access to technology in Florida (73.4\%) and Maryland (76.2\%). The highest percentages of library systems offer training to help students with their schoolwork in Iowa (64.2\%) and West Virginia ( $69.1 \%$ ). The highest percentages of library systems offer training to help business owners in Maryland (9.5\%) and Montana (9.9\%). The highest percentages of library systems offer training to provide general technology skills in Kentucky (72.4\%) and Montana (70.4\%). The highest percentages of library systems offer training to provide information literacy skills in Maryland ( $90.5 \%$ ) and Rhode Island ( $81.9 \%$ ). The highest percentages of library systems offer training to help users access government information and services in Delaware (60.0\%) and Rhode Island (52.8\%).

Figure 40: Public Library System Information Technology Training Availability for Patrons by State.

| State | The library does not offer patron information technology training services | Facilitates local economic development | Offers technology training opportunities to those who would otherwise not have any | Helps students with their school assignment and school work | Helps business owners understand and use technology and/or information resources | Provides general technology skills | Provide information literacy skills | Helps users access and use electronic government services and resources. |

Source: Bertot, J. C., McClure, C. R., Jaeger, P. T., \& Ryan, J. (2006). Public Libraries and the Internet 2006: Study Results and Findings. Tallahassee, FL: Information Use Management and Policy Institute,
Florida State University. Available: http://www.ii.fsu.edu/plinternet/

Figure 41 (below) shows library system perceptions of the impacts of the availability of Internet access in the public library on the community served by the library:

- The provision of information for local economic development was noted by the highest percentage of library systems in Washington (15.1\%).
- The provision of information about local and state business opportunities was noted by the highest percentage of library systems in New York (98.8\%).
- The provision of Internet training and skills was noted by the highest percentage of library systems in Florida (76.8\%).
- The provision of real estate information was noted by the highest percentage of library systems in Alaska (8.0\%).
- The provision of community information was noted by the highest percentage of library systems in Connecticut (38.2\%).
- The provision of information for local business marketing was noted by the highest percentage of library systems in Delaware (20.0\%).
- The provision of services for job seekers was noted by the highest percentage of library systems in North Carolina (78.2\%).
- The provision of investment information or databases was noted by the highest percentage of library systems in Colorado (16.3\%).
- The provision of education resources for K-12 students was noted by the highest percentage of library systems in Georgia (86.8\%).
- The provision of education resources for students in higher education was noted by the highest percentage of library systems in Alabama (46.5\%).
- The provision of education resources for home schooling was noted by the highest percentage of library systems in Louisiana (33.3\%).
- The provision of education resources for adult and continuing education students was noted by the highest percentage of library systems in North Carolina (45.6\%).
- The provision of information for college applicants was noted by the highest percentage of library systems in Delaware (20.0\%).
- The provision of access to local and state government documents was noted by the highest percentage of library systems in Nevada (32.1\%).
- The provision of access to federal government documents was noted by the highest percentage of library systems in Washington (20.3\%).
- The provision of access to local, state, and federal electronic government services was noted by the highest percentage of library systems in Rhode Island (47.2\%).

One can therefore see the variation in the impacts of Internet access across the states.
