Project Title: Embedding Usability Engineering in Library Automation - Phase One Testing
Investigator(s):   Myke Gluck
Funding Agency: College Center for Library Automation
Award Dates: March 2000 – August 2000
Award Amount: $10,973

The purpose of this project was to evaluate the usability of new interfaces for LINCC and the Online Computer Library Center (OCLC) site searches, and to evaluate the College Center for Library Automation (CCLA) website. The Institute developed test protocols, instrumentation, and scenarios to assess the ease of use, ease of learning, and user satisfaction with all three interfaces.
